

3.6.4.1 Journey map

Model D: Customer with a Third Party account

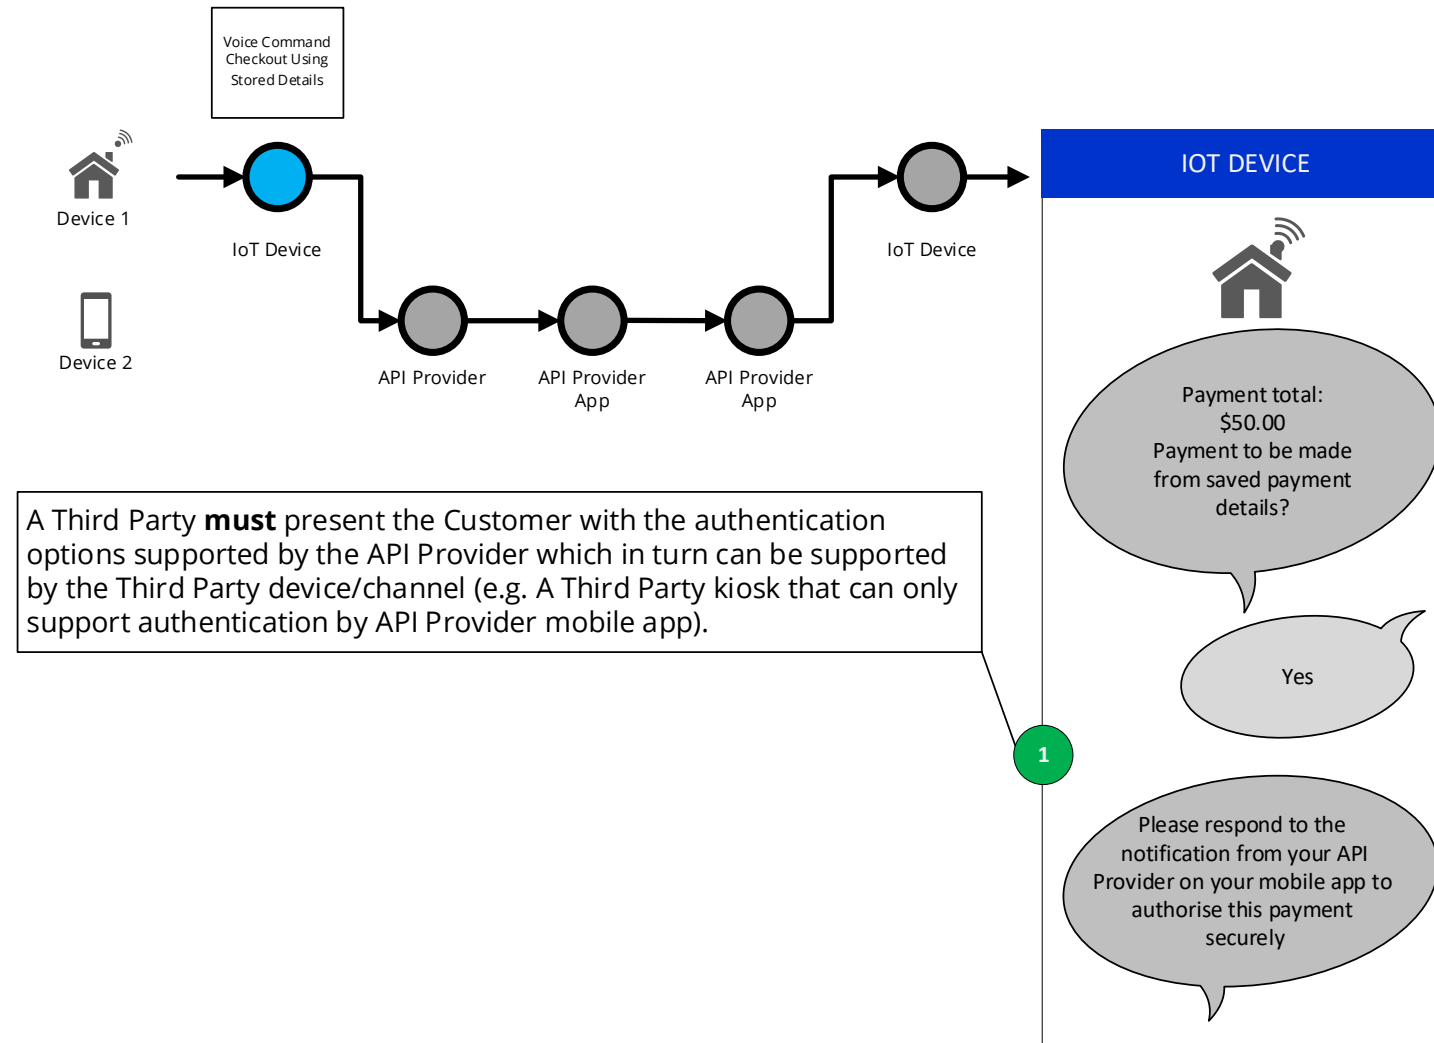

3.6.4.2 Wireframe journey

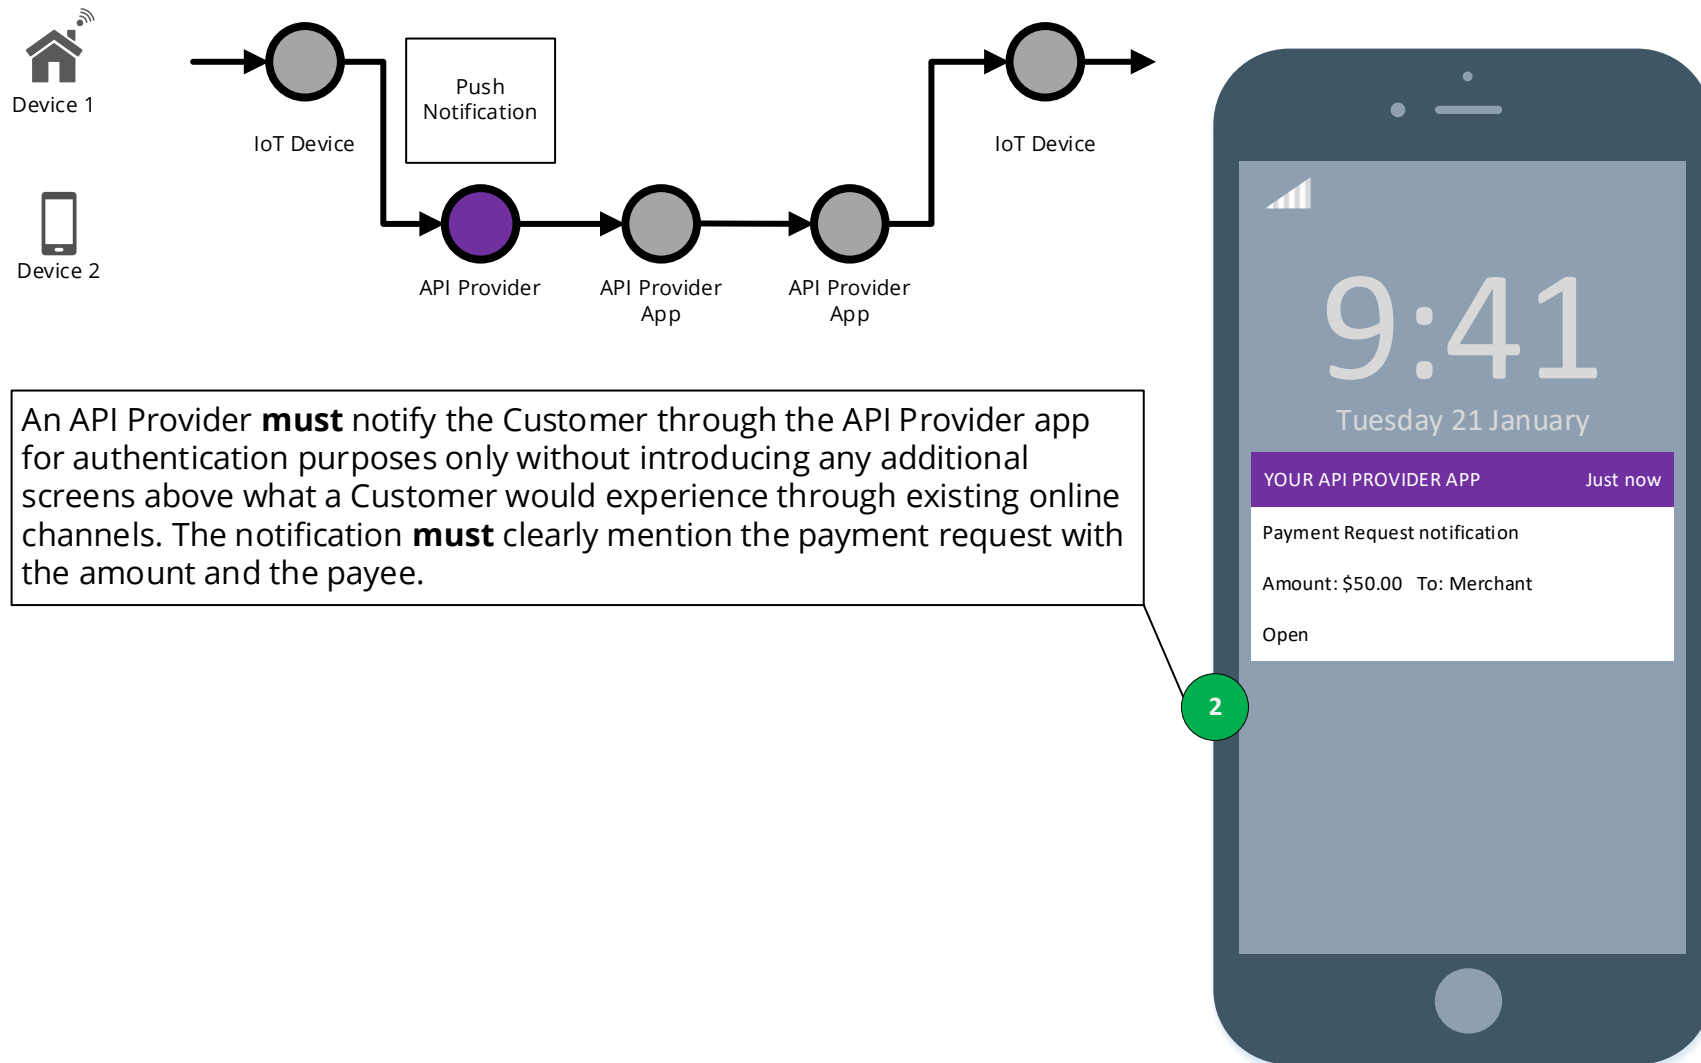

3.6.4.3 Wireframe annotations

3.6.4.3.1 Voice command checkout

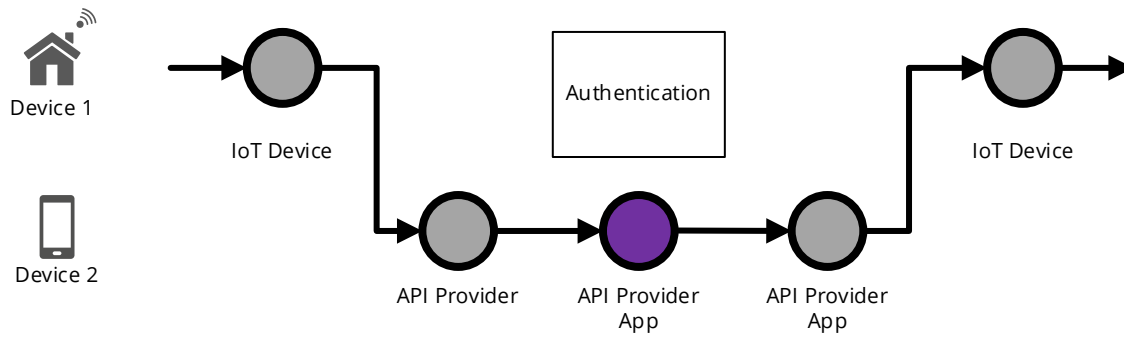

3.6.4.3.2 Push notification

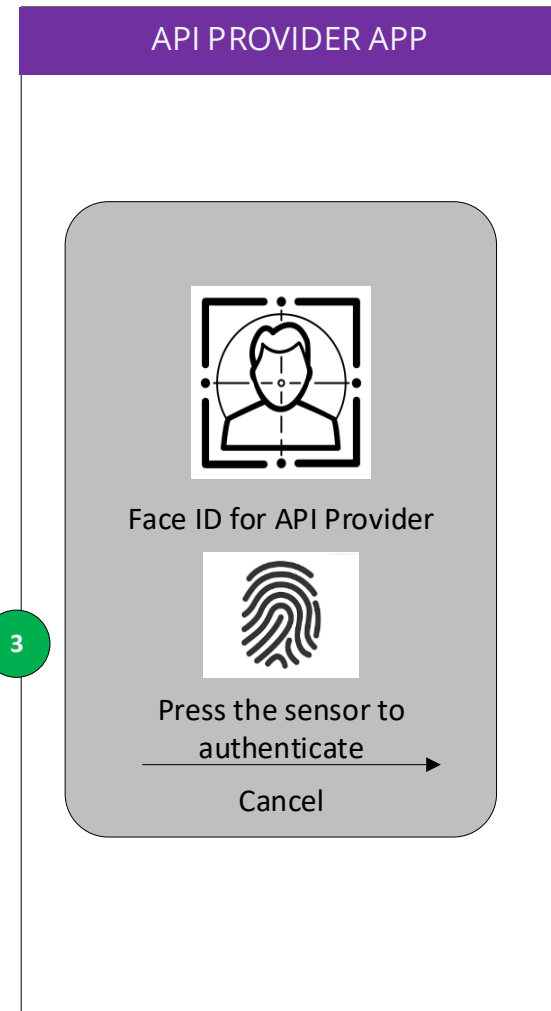

An API Provider **must** notify the Customer through the API Provider app for authentication purposes only without introducing any additional screens above what a Customer would experience through existing online channels. The notification **must** clearly mention the payment request with the amount and the payee.

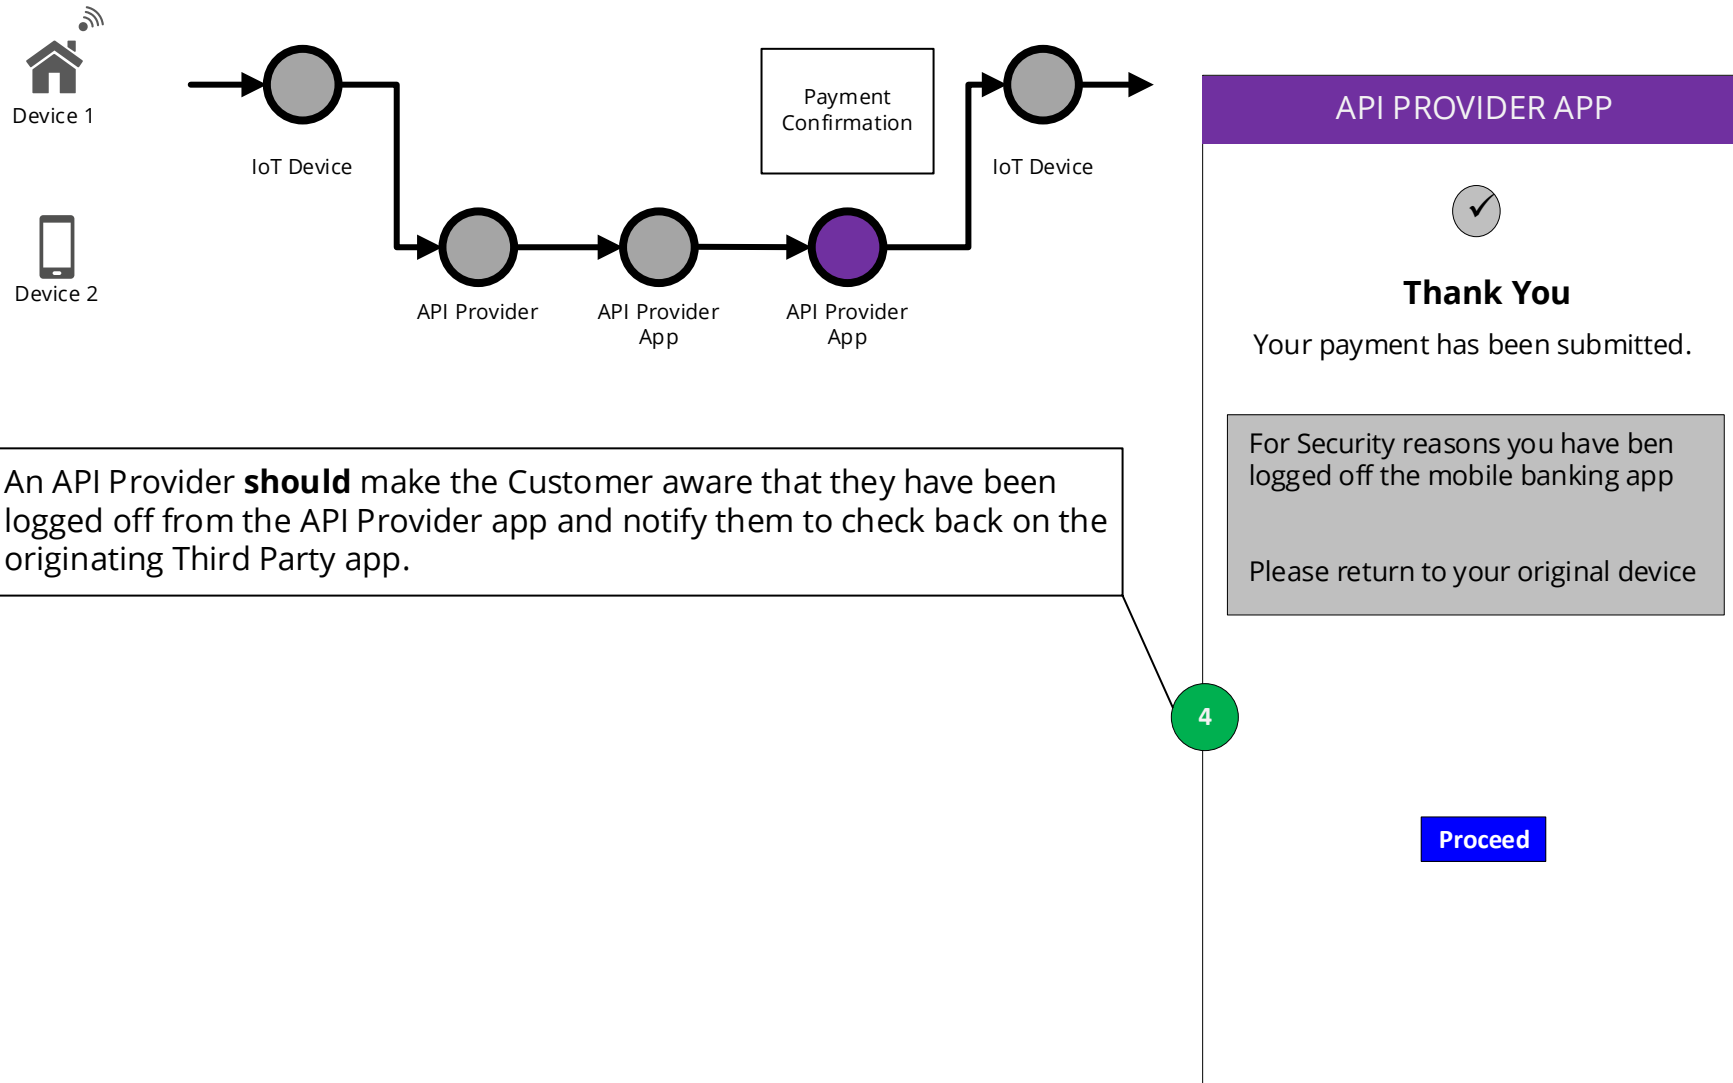

3.6.4.3.3 Authentication

An API Provider app based authentication **should** have no more than the number of steps that the Customer would experience when directly accessing the API Provider mobile app (biometric, passcode, credentials).

3.6.4.3.4 Payment confirmation

3.6.4.3.5 Confirm transaction
